

NASHVILLE INTERNATIONAL (BNA)
NASHVILLE, TENNESSEE

Hot Spot Chart

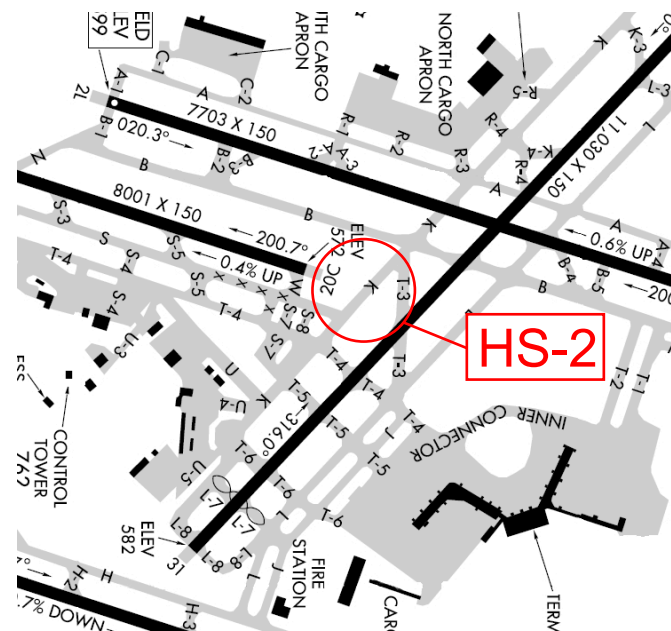

For informational purposes only. Not an official airport diagram.

Hot Spots

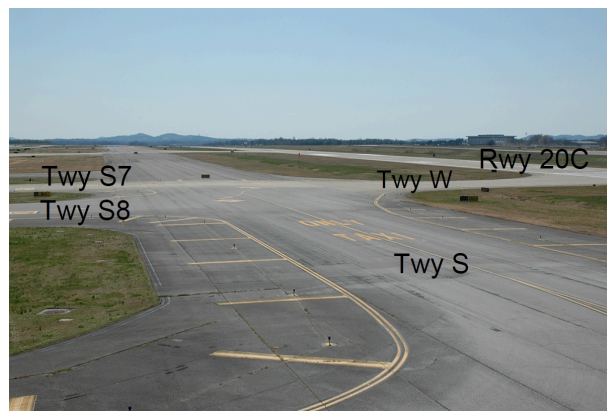

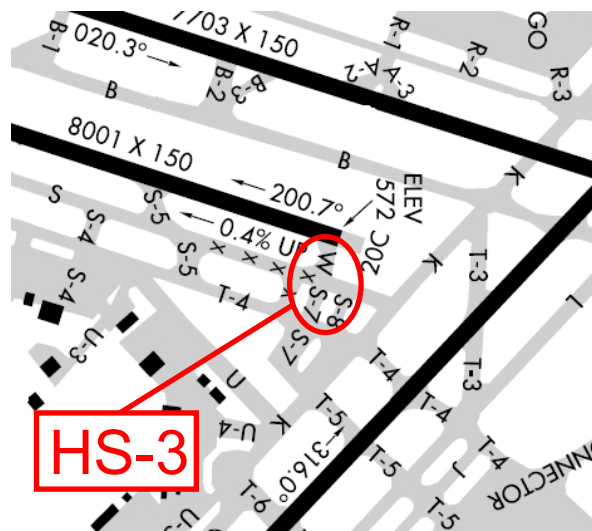

Hot Spot-1 - Intersections of Taxiways Romeo-3, Kilo, and Alpha. Runway 2L/20R lies east of intersection and Runway 13/31 lies north of intersection. Some pilots and vehicle operators get confused as to whether they are on Taxiway Alpha or Kilo when exiting the ramp at Romeo-3. Some get confused about the location of taxiway Alpha when traveling southeast on taxiway Kilo and approaching Alpha intersection due to the angles of intersection.

NASHVILLE INTERNATIONAL (BNA)

Hot Spots

Hot Spot-2 - Runway 20C approach area and taxiway Kilo. Taxiway Kilo is in the RPZ of Runway 20C and must be kept clear of aircraft/vehicle when aircraft are arriving/departing Rwy 20C/20C. Pilots and vehicle operators sometimes continue through this area because it doesn't actually intersect with the Runway surface.

Hot Spots

Hot Spot-3 - Rwy 20C at taxiways Whiskey and Sierra-7. General aviation pilots have taxied to Runway 20C via taxiways Sierra-7 and Whiskey and departed without ATC clearance.
